SUMMARY

Microsoft PL-300 Certified Data Analyst with 4.3+ years delivering client-facing business intelligence across pharmaceutical and manufacturing sectors. Specialized in Power BI, SQL, and Python for executive decision support, with proven impact in cost reduction, market analytics and AI-driven automation. Adept at translating complex datasets into strategic recommendations for cross-functional and senior stakeholders.

SKILLS & TOOLS

BI & Visualization: Power BI (DAX, Power Query), Advanced Excel, Tableau (Basic)

Data & Querying: SQL (Advanced), Python (Pandas, NumPy), Snowflake

Cloud & Platforms: Microsoft Azure (Power BI Service), Azure Data Studio

Process & Automation: ETL Pipelines, VBA Macros, AI-Driven Workflow Automation

Soft Skills: Stakeholder Communication, Cross-functional Collaboration, Project Management, Data Storytelling

PROFESSIONAL EXPERIENCE

Rubicon Research Ltd.

Mar 2024 – Present

Data Analyst — Executive

- Engineered an end-to-end data validation and cleansing pipeline for raw pharmaceutical sales data across 5+ product lines, reducing data errors by ~40% and ensuring 100% downstream report accuracy — directly supporting go/no-go investment advisory decisions for senior stakeholders.
- Conducted feasibility analyses on 20+ active pharmaceutical products using advanced Excel (nested formulas, dynamic arrays, lookups), surfacing market viability trends that informed client-ready investment recommendations for the project management team.
- Consolidated intelligence from 7+ pharmaceutical platforms (IQVIA-MIDAS, IPD Analytics, DailyMed, Drugs@FDA, Orange Book, APiFDF) into unified competitive product intelligence reports, accelerating market research turnaround by 20% and enabling faster strategic advisory delivery.
- Executed a product portfolio analysis identifying 12+ redundant SKUs and developed a data-driven consolidation strategy that merged overlapping product lines, reducing operational costs by 25% — recognized by senior management for measurable business impact.
- Authored complex SQL queries to extract and analyse transactional sales data for 10+ new drug launches, building product lifecycle reports with data-backed revenue forecasts and investment recommendations for executive stakeholders.
- Designed and deployed 5+ interactive Power BI dashboards with advanced DAX measures and dynamic filters for C-suite leadership, visualizing KPIs across pricing, promotional ROI, and territory performance — directly influencing quarterly go-to-market strategy.
- Identified and implemented AI-driven automation across 3 core business workflows — pricing optimization, promotional analytics, and product performance tracking — reducing manual analysis effort by 30% and delivering real-time insights to sales and marketing teams.

Knest Aluform Pvt. Ltd.

Dec 2021 – Feb 2024

Data & Process Analyst (formerly Design Engineer)

- Built and maintained ETL pipelines using Power Query and advanced Excel (PivotTables, Pivot Charts) to clean, validate, and transform large-scale sales datasets, reducing report development time by 25% through streamlined data collection across cross-functional teams.
- Developed VBA macros to automate repetitive data processing tasks, improving operational efficiency and reducing manual effort across reporting workflows.
- Designed interactive Power BI dashboards visualizing key product sales metrics — revenue, unit volume, and competitor market share — enabling data-driven decisions for business stakeholders.

- Conducted exploratory data analysis (EDA) across sales, revenue, marketing, and operations functions, delivering strategic insights that supported a product consolidation initiative resulting in a 25% reduction in operating costs.

PROJECTS

E-Commerce Sales Performance Analysis | *Python, SQL, Power BI*

- Analysed monthly and yearly sales growth trends across product categories and regions for an e-commerce dataset of 50,000+ transactions.
- Identified top-performing SKUs and evaluated discount impact on margins, delivering an executive-ready Power BI dashboard with actionable revenue optimization recommendations.
- Assessed sales representative performance using KPI benchmarking, enabling data-backed resource allocation decisions.
- **GitHub:** github.com/Pratik1166

Products KPI — Exploratory Data Analysis | *Python (Pandas, Matplotlib, Seaborn)*

- Performed end-to-end EDA on sales data to uncover product performance trends, customer behaviour patterns, and seasonal demand cycles.
- Identified a high-value customer cohort (8% of base) driving 45% of total revenue, directly supporting a targeted retention campaign strategy.
- Visualized geographical sales distribution using Matplotlib heatmaps, pinpointing 3 underserved regions with 25%+ untapped demand potential.
- **GitHub:** github.com/Pratik1166

EDUCATION

Dr. D. Y. Patil Institute of Engineering & Management, Pune

June 2021

Bachelor of Engineering — Civil Engineering

Relevant Coursework: Statistics, Linear algebra, calculus, Project Management

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300)	2026
Data Analytics & Visualization — Accenture (Forage)	2025
Business Analysis & Process Management — Coursera	2024
SQL Advanced Certified — HackerRank	2024
Advanced Excel Training — Rubicon Research	2024

ADDITIONAL INFO

- Spot Awarded by senior management for leading a data-driven SKU rationalization initiative that reduced operational costs by 25% through cross-functional process redesign — presented findings directly to executive leadership.
