SUMMARY

Senior Data Analyst with 4.5+ years of experience delivering AI-driven analytics, workflow automation, business intelligence, and process optimization across pharmaceutical and manufacturing domains. Expertise in Python (Pandas, NumPy), SQL, Power BI, Excel, and data wrangling to automate reporting, accelerate trend identification, perform gap analysis, and deliver real-time business insights. Experienced in designing self-service leadership dashboards, analyzing revenue and KPI performance, automating reporting workflows, and partnering with cross-functional stakeholders to translate complex data into strategic business decisions. Strong background in business process improvement, dashboard automation, and scalable analytics solutions supporting executive leadership.

SKILLS & TOOLS

Analytics & Visualization: Power BI (DAX, Power Query, RLS), Advanced Excel, Tableau (Basic)

Data & Querying: SQL (Advanced), Python (Pandas, NumPy), Snowflake

Cloud & Platforms: Microsoft Azure (Power BI Service), Azure Data Studio

Process & Automation: ETL Pipelines, Gap Analysis, AI-Driven Workflow Automation

Soft Skills: Stakeholder Communication, Cross-functional Collaboration, Revenue Analytics

PROFESSIONAL EXPERIENCE

Rubicon Research Ltd.

Mar 2024 – Present

Executive Data Analyst

- Collaborated with Marketing, Sales, Finance, Commercial Excellence, and Operations teams to translate business requirements into automated reporting solutions, actionable category analytics, and data-driven business strategies.
- Performed revenue trend analysis, gap analysis, and performance benchmarking across pharmaceutical sales data to identify optimization opportunities and support strategic planning.
- Designed and deployed scalable, governed Power BI reporting solutions with advanced DAX measures, star-schema-based data models, and Power Query (M language) transformations, used directly in quarterly business reviews and leadership strategy workshops.
- Engineered scalable SQL and Python data pipelines integrating APIs, relational databases, JSON, and OData sources for intelligent reporting, automated data extraction, and enterprise analytics.
- Configured Row-Level Security (RLS), data refresh gateways, and workspace management to support secure, enterprise-grade access control across executive dashboards.
- Applied version control and governance practices (GitHub/Azure DevOps) to manage report lifecycle, deployment, and change tracking across recurring Power BI solutions.
- Built interactive dashboards with drill-throughs, dynamic filters, and bookmarks tracking revenue, gross margin, pricing, and territory performance KPIs, adopted directly by BDs and senior stakeholders.
- Engineered an end-to-end data validation and cleansing pipeline for raw sales data across 10+ product lines, reducing data errors by ~40% and lifting downstream report accuracy to 90%.
- Designed AI-assisted reporting automation using Python (Pandas, NumPy) and Power BI to automate recurring pricing, revenue, promotional, and product performance reporting, reducing manual effort by 30% while accelerating trend identification and business decision-making.

Data & Process Analyst (formerly Design Engineer)

- Built automated ETL workflows using Power Query, SQL, Excel, and VBA to streamline data extraction, cleansing, and reporting processes, reducing report development time by 25%.
- Collaborated with Sales, Finance, Operations, and Project Management stakeholders to translate business requirements into governed, enterprise-ready dashboards, improving business review efficiency by 25%.
- Developed VBA macros to automate repetitive data processing tasks, improving reporting workflow efficiency and reducing manual maintenance effort.
- Evaluated existing reporting processes and recommended workflow improvements that reduced report preparation time by 25%.
- Designed executive dashboards providing real-time KPI tracking, operational trend analysis, and performance reporting for Sales, Finance, and Operations leadership.
- Developed interactive Power BI dashboards and management reports supporting executive business reviews.
- Analyzed operational and sales processes to identify inefficiencies, contributing to a 25% reduction in operating costs through data-driven recommendations.
- Collaborated with cross-functional teams throughout reporting projects from requirement gathering to implementation and stakeholder review.

PROJECTS

E-Commerce Sales Performance Analysis | Python, SQL, Power BI, Excel | [Link](#)

- Built automated Python data pipelines to cleaned and analysed 10K+ e-commerce transactions.
- Performed category-level and SKU-level revenue analysis.
- Identified revenue gaps and high-growth product opportunities.
- Developed Power BI dashboards for self-service business reporting.
- Delivered actionable recommendations for pricing optimization and revenue growth.

Products KPI Exploratory Data Analysis | Python (Pandas, Matplotlib, Seaborn), Excel | [Link](#)

- Performed end-to-end EDA on sales data to uncover product performance trends, customer behaviour patterns, and seasonal demand cycles.
- Identified a high-value customer cohort (8% of base) driving 45% of total revenue, directly supporting a targeted retention campaign strategy.
- Visualized geographical sales distribution using Matplotlib heatmaps, pinpointing 3 underserved regions with 25%+ untapped demand potential.

EDUCATION

Dr. D. Y. Patil Institute of Engineering & Management, Pune

June 2021

Bachelor of Engineering — Civil Engineering (CGPA 7.2/10)

Relevant Coursework: Mathematics & Statistics, Linear Algebra, Calculus, Project Management

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300)	2026
Data Analytics & Visualization — Accenture (Forage)	2025
Business Analysis & Process Management — Coursera	2024
SQL Advanced Certified — HackerRank	2023
Advanced Excel — Rubicon Research	2024

ADDITIONAL INFO

- Spot Awarded by senior management for leading a data-driven SKU rationalization initiative that reduced operational costs by 25% through cross-functional process redesign — presented findings directly to executive leadership.
